Beschreibung der Methodik gemäss Kapitel 2/Ziff. 4 Transparenzrichtlinien:

The reporting period covers 1 January 2025 to 31 December 2025.

Educational Grants were identified through a review of relevant internal records and reconciled against grant documentation, supporting documentation and payment records. The disclosure includes grants within the scope of the Swiss Medtech Transparency Guidelines, including support provided to Swiss healthcare organisations and professional conference organisers for third-party educational events in Switzerland.

Certain amounts included in this disclosure relate to congress sponsorships and sponsorship packages. While these arrangements may include commercial or visibility-related elements, the amounts paid to the relevant healthcare organisations or professional conference organisers have been included in the disclosure in accordance with the applicable Swiss Medtech guidance and, where appropriate, the principle of transparency in cases where the classification may involve both educational and commercial elements.

Multiple reportable grants to the same organisation during the reporting period have been aggregated into one annual amount.

Reportable amounts are disclosed using the Swiss Medtech template and applicable recipient/category classification. Foreign-currency amounts were reported in CHF based on the applicable amounts recorded in the Company's accounting and payment records. Original currency amounts are retained for reconciliation purposes. VAT and other applicable tax considerations were treated consistently with the Company's accounting records.

Name des Unternehmens: Novocure GmbH

Datum: 26.08.2026
